

XD-J6 Intelligent precision cold welding machine

Four functions

- Pulse precision spot welding
- Continuous pulse spot welding
- Continuous welding
- Electric resistance welding

Product advantages

- ✓ **Full intelligent digital control**
Adopt intelligent full digital display screen, more clearly display adjustment parameters increase the convenience of operation;
- ✓ **Strong binding strength**
Use fusion welding technology, high welding bonding firmness will not appear falling off the welding bonding problem.
- ✓ **Matched manipulator arm**
Can match the automatic mechanical arm welding, improve the welding speed and welding quality, save costs
- ✓ **High precision welding repair welding**
Microcomputer chip control output current and time, 0.2mm welding wire can also be welded at will, so as to achieve the accuracy of laser welding machine welding;
- ✓ **Powerful and stable**
3000W super power, when the power supply voltage fluctuates within the range of $\pm 20\%$, the equipment can still operate stably, fast and stable output;
- ✓ **Humanized operation**
Simple operation, ordinary workers can operate, easy to carry, the bottom of the equipment with 4 pulleys, easy to move

Technical parameter

Power supply	Single phase 220V \pm 20% -50HZ	Power Consumption	10-4000w
Maximum laser power	>80kw	Output current of arc welding	5-200(adjustable)
Output welding time	20-999 (adjustable)	interval time	10-999 (adjustable)
Resistance welding output	high/ low frequency 1-10 adjustable	Cooling method	Forced air cooling by fan
Welding wire size range	0.2-4.0mm	Argon delay time	0.9s
Machine size	500*270*420mm	Weight	38kg

Welding repair case
